SINDHI PU COLLEGE
12th, PCMC

PROJECTS

Templify
Developed a django-based app for cashier in temples that facilitates booking sevas, taking donations, and generating receipts. Leveraged python and django to build a robust and user-friendly application. Contributed to enhancing the temple's financial management system and improving user experience. Working in a team

Student Sanctuary
Student Sanctuary is a platform that aims to create a supportive and safe environment for students to connect with each other and with their teachers. The platform includes a chat feature, which allows teachers to make announcements and connect with their students. College administrators can also create custom roles and assign them to students as needed. By providing a space for students to connect and communicate, Student Sanctuary hopes to foster a sense of community and support among students.
