Bangalore

TRAINING

Software Development Course in Jspiders, Rajajinagar, Bangalore.

PROJECTS

Student Sanctuary

Student Sanctuary is a platform that aims to create a supportive and safe environment for students to connect with each other and with their teachers. The platform includes a chat feature, which allows teachers to make announcements and connect with their students. College administrators can also create custom roles and assign them to students as needed. By providing a space for students to connect and communicate, Student Sanctuary hopes to foster a sense of community and support among students.

Language used

Frontend: CSS, HTML, Javascript, Bootstrap

Backend: MySQL, MongoDB, Python, Flask
